## Purpose of the CoCRP workshop

The purpose of the workshop is to exchange knowledge and lessons on how to enable rapid, effective, coordinated and flexible responses in man-made and natural crises. Feedback from end-users on the evolving DARWIN Resilience Management Guidelines, will consequently contribute to enhance EU responses to crises.

## Scope of the workshop

The workshop focuses on the two domains of DARWIN: health care and air traffic management. Accordingly, actors working with resilience within these domains will be the main participants.

## Deliverable of the workshop

The main deliverable of the workshop will be the end-users' input and perspective on resilience guidelines.

## Take away

This workshop will give participants information of up-to-date and evolving resilience guidelines that can enable rapid, effective, coordinated and flexible responses. Further, it will facilitate exchange of knowledge, insights, expertise and lessons learnt for practitioners and researchers, and thus promote international networking concerning resilience aspects.
